## MULTIPLICATION WORD PROBLEMS <br> SALAMANDER SPORTS DAY

## Use your multiplication table to help you solve these problems.

1) Tyger Salamander has a skipping rope 5 ft long. Captain Salamander's rope is 3 times longer. How long is the Captain's rope? $\qquad$ ft
2) Tyger Salamander skips for 4 minutes and manages to skip 7 times every minute. How may skips does he do? $\qquad$ skips
3) Captain Salamander skips for 3 minutes and manages 9 skips a minute. How many skips does he do? $\qquad$ skips
4) In the running race, Frazer manages to run at 6 miles per hour. Flame runs three times as fast. What is her speed? $\qquad$ mph
5) In the jumping race, Captain Salamander jumps 6 inches off the ground.

Sally the Shape Salamander manages to jump 4 times higher. How high does she jump? $\qquad$ inches
6) In the mud throwing competition, Tyger throws his mud 9 inches. Quadra throws her mud twice as far. How far does she throw her mud? $\qquad$ inches
7) In the running race, it takes Quadra 9 seconds to complete the race. Frazer is 3 seconds slower than her. How fast is Frazer? $\qquad$ seconds
8) At the end of the sports day, Quadra has 8 points. Captain Salamander has 5 times as many points. How many points does the Captain have? $\qquad$ points One of these problems is a not a multiplication problem at all! Can you spot it?

## MULTIPLICATION WORD PROBLEMS ANSWERS SALAMANDER SPORTS DAY

1) Tyger Salamander has a skipping rope 5 ft long. Captain Salamander's rope is 3 times longer. How long is the Captain's rope? $15 \mathrm{ft}(5 \times 3=15)$
2) Tyger Salamander skips for 4 minutes and manages to skip 7 times every minute. How may skips does he do? 28 skips ( $7 \times 4=28$ )
3) Captain Salamander skips for 3 minutes and manages 9 skips a minute. How many skips does he do? 27 skips ( $3 \times 9=27$ )
4) In the running race, Frazer manages to run at 6 miles per hour. Flame runs three times as fast. What is her speed? $18 \mathrm{mph}(6 \times 3=18)$
5) In the jumping race, Captain Salamander jumps 6 inches off the ground. Sally the Shape Salamander manages to jump 4 times higher. How high does she jump? 24 inches ( $6 \times 4=24$ )
6) In the mud throwing competition, Tyger throws his mud 9 inches. Quadra throws her mud twice as far. How far does she throw her mud? 18 inches ( $9 \times 2=18$ )
7) In the running race, it takes Quadra 9 seconds to complete the race. Frazer is 3 seconds slower than her. How fast is Frazer? 12 seconds ( $9+3=12$ )
8) At the end of the sports day, Quadra has 8 points. Captain Salamander has 5 times as many points. How many points does the Captain have? 40 points ( $5 \times 8=40$ )

One of these problems is a not a multiplication problem at all!
