# Answers

Compare and order the following sets of numbers.

1) 850                      799                      356                      256                      999

$999 > 850 > 799 > 356 > 256$

---

2) 125                      251                      501                      105                      152

$105 < 125 < 152 < 251 < 501$

---

3) 446                      644                      407                      650                      464

$650 > 644 > 464 > 446 > 407$

---

4) 315                      313                      317                      319                      316

$313 < 315 < 316 < 317 < 319$

---

5) 750                      570                      507                      705                      707

$750 > 707 > 705 > 570 > 507$

---

6) 380                      350                      310                      290                      330

$290 < 310 < 330 < 350 < 380$
