# Answers

Compare and order the following sets of numbers.

1) 250                      299                      929                      520                      255

$929 > 520 > 299 > 255 > 250$

---

2) 345                      354                      254                      542                      453

$254 < 345 < 354 < 453 < 542$

---

3) 399                      299                      199                      599                      699

$699 > 599 > 399 > 299 > 199$

---

4) 175                      157                      256                      562                      626

$157 < 175 < 256 < 562 < 626$

---

5) 323                      343                      303                      330                      332

$343 > 332 > 330 > 323 > 303$

---

6) 446                      644                      464                      664                      646

$446 < 464 < 644 < 664 < 646$
